

# EXACTA

# EXCEL

Exacta's Excel Teller system is designed for automatic and tunnel wash applications. This system has the ability to be a stand alone unit with the capabilities of accepting cash, coin and producing change. Many other options are available including the POS option, which gives the site the abilities to Page, access the Remote Accounting, and also generate codes and discount codes. The Credit Card, Fleet Card, and the Swipe & Save options are available. Combining these options will create a machine that will suit every customer's needs.
