

Maxx Teller

Exacta's Maxx II Teller system is designed for multiple applications; from in-bay automatic and tunnel car wash applications to automated parking systems and kiosk sales. This automated teller system can stand alone with the capabilities of accepting cash, coin and producing change. Add the available POS server and enable remote accounting & reporting, generate promotional codes accept Credit Cards, Gift Cards, Fleet Cards, and Swipe & Save options. The flexibility of the Maxx through combining some or all of these options will create a program for any model of operation. All models include a stainless steel cabinet with high security locks and your choice of molded fiberglass or a lexan door overlay. Customer service features include voice prompts, 4 line backlit display, receipt printer, proximity sensor and 4 selection keypad.

The base unit includes: coin hopper, bill validator, coin acceptor and card reader
